About Me

I'm a lifelong nerd with a passion for creativity through technology. I've been hacking software together since my childhood in the dial-up days of the mid to late '90s. In college, I studied both Music and Film Production. In 2012, I shifted my professional focus from music and film to software. Since 2018, I've worked remotely, full-time, from my studio/office in Ft. Lauderdale, Florida. In my free time, I enjoy tinkering with hardware/software in my home lab, working on my solo electronic music project (Sam Kaz), and pursuing extreme sports.
