About Me

I'm a lifelong nerd with a passion for creativity through technology. I've been hacking software together since my childhood in the dial-up days of the mid to late '90s. In college, I studied both Music and Film Production. In 2012, I shifted my professional focus from music and film to software. Since 2018, I've worked remotely, full-time, from my studio/office in Ft. Lauderdale, Florida. In my free time, I enjoy tinkering with hardware/software in my home lab, working on my solo electronic music project (Sam Kaz), and pursuing extreme sports.

SKILLS

Front-End

HTML5 | CSS3 | JavaScript | ES6

Front-End Frameworks

Vue | React | Bootstrap | jQuery | Gatsby | Jekyll

Back-End

nginx | Apache | NodeJS | PHP7 | SQL | NoSQL

Back-End Frameworks

Laravel | WordPress | Express | Shopify | Magento

Local Environment

macOS | Debian | Arch | Windows

Servers

CentOS | Debian | Ubuntu | Raspbian

DevOps

Infrastructure as Code | Source Control | Virtualization | Containerization | CI/CD | Cloud Platforms | AWS

Tools

cli | bash | zsh | git | brew | docker | docker-compose | node | npm | webpack | sass | postcss | gulp | grunt

Key Knowledge Areas

Automation | Compatibility | Optimization | Best practices | Security | OWASP Top Ten | APIs | Git Flow
